

A place for course materials.

This is a small Demo PDF for testing the academic hub.

It is not an actual lecture handout, research result, or publication.

The accompanying page demonstrates:

- A desktop PDF preview
- Open and Download links
- A mobile fallback to your preferred PDF reader

Replace this file with your own authorized course material,
then update the attachment URL in the Markdown frontmatter.

Small PDFs can live in `public/documents` or `public/uploads`.

Keep large files and raw scientific datasets in external archives.
